---

As requested, the attached spreadsheet was, I think, originally sent to Ryan a few months ago. The VB Family Farms does not now appear on the list. Once completed, our inspection report and other documentation for this facility will be added to the other inspections completed in April-May 2012 when we ship those to Region 5.

Hi Bruce,

I was wondering if the list of facilities that your staff has chose to inspect for the workplan has gone out, yet if you have it could would you forward it to me.

Also, I wanted to inform you that EPA did inspections in the Lower and Middle Kaskaskia area on May 1 and May 2. One of the sites we had on our list was from Glen Von Bokel, also known as VB Family Farms. When we met up with Bruce and Brian Rodely they informed me that this site was called in as a citizen complaint and they had planned on doing an inspection as well.

I had asked Bruce and Brian if they could lead the inspection because of the citizen complaint and the issues that the facility has the state has more regulations to enforce against this facility. So, on May 1st 2012, Brian and Bruce led a

complete and thorough inspection of the facility and I have added it as one of the 25 inspections that needed to be done between April and May in that area.

If there is any problem adding this facility on to list for the 25 please let me know, if that was OK with you.

Sincerely,

Cheryl Burdett
